Technical profiles for Greenhouses, packaging and storage

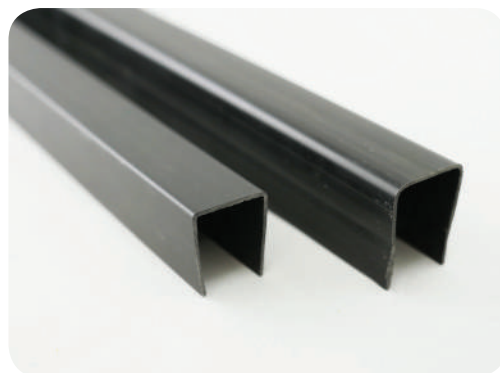

Dripper and Irrigation pipes guard for precision irrigation

"U" Shape PVC profile for covering dripper and irrigation pipes, preventing from birds and animals to reach and pierce the pipes during their drinking water search.

- High impact rigid PVC provide higher protection from external penetration into the softer PE/PP irrigation pipes.
- Increased precision irrigation and water saving.
- Ecological solution – replacing Pesticides.
- Simple laying and maintenance free, money saving and fast ROI.
- UV protected for long lasting durability.
- Available for all irrigation pipes sizes.

Threaded PVC pipes

For overhead sprinklers, irrigation control head and pressure piping

- PVC Schedule 40 and 80 pressure pipes.
- Diameters ½"-3" with 5-100mm length.
- BSPT Thread according EN10226.
